third party provider

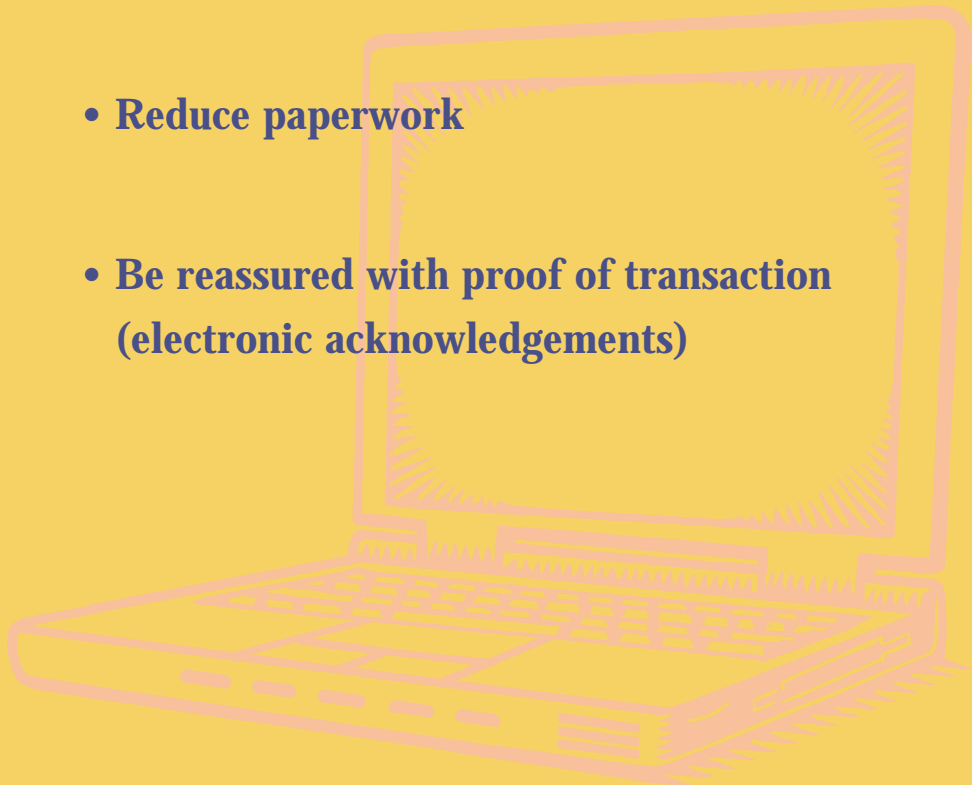

for Business is a vast and growing set of electronic services from IRS—designed for busy tax professionals with business clients. These services give you convenient and efficient methods for filing your clients' business returns—by phone, PC software, or Internet depending upon the return being filed.

As more and more businesses adopt electronic options for other areas of their business, they will also want to have their business returns filed electronically—and they will look to you for assistance. IRS e-file for Business offers you electronic filing options that you can use to provide additional services to meet your business clients' needs—and remain competitive.

It's easy to participate in *e-file for Business*. And as additional IRS forms become available for filing electronically, *e-file for Business* will become even more valuable to you and your clients.

With IRS *e-file for Business*, both you and your business clients benefit...

- **Save time**
- **Improve accuracy**
- **Increase the speed of filing**
- **Reduce paperwork**
- **Be reassured with proof of transaction
(electronic acknowledgements)**

Request Enhanced Software Products

Just as you are key to the success of *e-file for Business*, so too are the software developers key to your success in being able to integrate tax filing and paying into your business operation. Technology is rapidly changing and software providers are ready to develop comprehensive programs that integrate both filing and paying business taxes electronically.

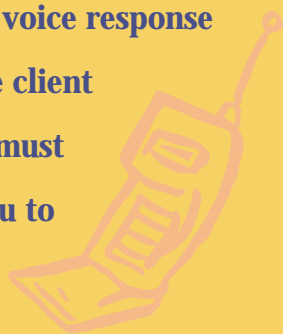

Contact your software providers. Tell them what would make your job easier in terms of integrating accounting, return preparation, electronic filing and electronic payment. They need your input.

File **and** Pay Electronically

Use *e-file for Business* to file your business clients' returns and use the EFTPS (Electronic Federal Tax Payment System) to pay all business taxes electronically. With EFTPS you can use the phone, PC software and the Internet (September, 2001).

You receive the same benefits from EFTPS as with *e-file for Business*—speed, accuracy, security, and proof of all transactions, *plus payment history*.

To use EFTPS, you can use the free Batch Filer software for transmitting multiple payments at the same time. You can also use the automated voice response phone system or the Internet to make client payments one at a time. Your clients must be enrolled in EFTPS in order for you to make payments on their behalf.
